

The University of Sydney
School of Civil Engineering
Email: michael.heisel@sydney.edu.au

Education

- PhD in Civil Engineering, Minor in Aerospace Engineering, 2020
University of Minnesota-Twin Cities; Minneapolis, Minnesota, USA
- BS in Mechanical Engineering, 2012
Rice University, Houston, Texas, USA

Professional Appointments

- Lecturer, School of Civil Engineering, The University of Sydney, 2023 – current
- Postdoctoral fellow, Department of Atmospheric and Oceanic Sciences, University of California in Los Angeles, 2020 – 2023
- Graduate student researcher, St Anthony Falls Laboratory, University of Minnesota-Twin Cities, 2015 – 2020
- Mechanical engineer, CH2M Hill, 2012 – 2015

Teaching Units

- CIVL5670 Reservoir, Stream and Coastal Engineering
- CIVL5999 Advanced Research and Analysis

Sponsored Research

- Arjomandi M, Monty J, Steinberg T, Cholette M, Chauhan K, Emes M, Jafari A, Marusic I, Westra S, Hutchins N, Tucker M, **Heisel M**, and G Picotti. *Facilities for Atmospheric Boundary Layer Evaluation and Testing*. ARC LIEF (Australian Research Council Linkage Infrastructure, Equipment and Facilities). AU\$1,200,000. 2024.
- **Heisel M**. *The building blocks of shear-driven atmospheric turbulence*. NSF-AGS-PRF-2031312 (US National Science Foundation Division of Atmospheric and Geospace Sciences postdoctoral research fellowship). US\$190,000. 2020 – 2022.

Journal PublicationsUnder consideration

Heisel M and M Chamecki (submitted). On the departure from Monin–Obukhov surface similarity and transition to the convective mixed layer. Submitted to *Boundary-Layer Meteorology*. ArXiv preprint: 2308.16405.

Ehsani R, **Heisel M**, Li J, Voller VR, Hong J, and M Guala (accepted). Stochastic modeling of the instantaneous velocity profile in rough wall turbulent boundary layers. Accepted to *Journal of Fluid Mechanics*.

Published

15. **Heisel M** and M Chamecki (2023). Evidence of mixed scaling for mean profile similarity in the stable atmospheric surface layer. *Journal of the Atmospheric Sciences* 80(8), 2057-2073. DOI: 10.1175/JAS-D-22-0260.1.
14. **Heisel M**, Sullivan PP, Katul GG, and M Chamecki (2023). Turbulence organization and mean profile shapes in the stably stratified boundary layer: zones of uniform momentum and air temperature. *Boundary-Layer Meteorology* 186, 533-565. DOI: 10.1007/s10546-022-00771-0.

Conference Proceedings

1. **Heisel M**, Dasari T, Petersen A, Liu Y, Hong J, Coletti F, and M Guala (2018). Characterizing turbulent structures in the atmospheric boundary layer with super-large-scale particle image velocimetry. *19th International Symposium on Applications of Laser and Imaging Techniques to Fluid Mechanics*; July 2018; Lisbon, Portugal.

Seminar Presentations

4. “A new perspective on mean flow similarity in the atmospheric boundary layer,” Fluid Mechanics Research Group, University of Melbourne, October 2023.
3. “Turbulent flow structure and mean profile similarity in the stably stratified atmospheric boundary layer,” Fluid Dynamics Group (AMME), University of Sydney, March 2023.
2. “Persistent shapes in boundary layer turbulence,” Department of Civil and Environmental Engineering, Duke University, November 2022.
1. “Building blocks of boundary layer turbulence,” Department of Atmospheric & Oceanic Sciences (AOS 271), University of California in Los Angeles, May 2022.

Service Activities

- Journal manuscript referee: *Boundary-Layer Meteorology*; *Experiments in Fluids*; *Fluids*; *International Journal of Heat and Fluid Flow*; *Journal of the Atmospheric Sciences*; *Journal of Fluid Mechanics* (more than 10); *Quarterly Journal of the Royal Meteorological Society*
- Funding proposal assessor: US Army Research Office; US National Science Foundation (CAREER and project)

Awards

- Doctoral Dissertation Fellowship, University of Minnesota-Twin Cities, 2019 – 2020
- International Thesis Research Travel Grant, University of Minnesota-Twin Cities, 2019
- Edward Silberman Fellowship, University of Minnesota-Twin Cities, 2017
- Johnson Fellowship, University of Minnesota-Twin Cities, 2015 – 2016
